

CodeRED Launcher App

Send notifications on-the-go

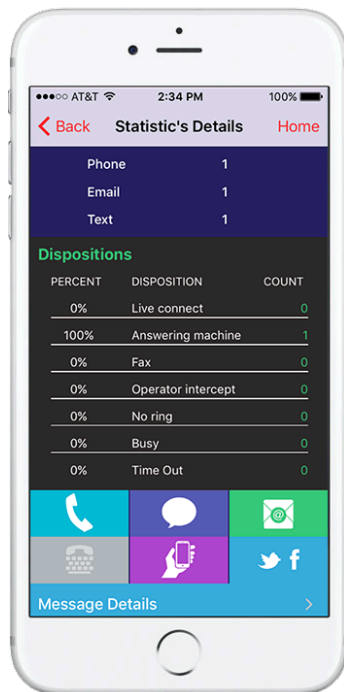

The CodeRED® Launcher app gives authorized users the ability to send notifications directly from their smartphone or tablet. Within seconds, users can send notifications to targeted contacts across geographic areas through the app.

Launch a notification from anywhere

The CodeRED Launcher App puts the power in your hands to create and send messages within seconds directly from your smartphone.

Experience the power of CodeRED from your mobile device

Track progress with full reporting capabilities

The solution is ideally suited for use in the field or for ad hoc community and staff alerts. It allows authorized users to start and stop critical message campaigns from any device, track campaign statistics upon completion of alerts to show the results of each completion attempt, and define precise locations for critical message delivery through the enhanced mapping interface. Using system credentials, only users with the authority to send messages to the public or within their organization may launch alerts.

OnSolve:

Always On. Solving Problems.

OnSolve is the market leader in real-time, mass notification and collaboration solutions used by the world's largest organizations. The OnSolve suite of critical communication tools is a key component of effective business continuity, emergency response, IT alerting, and security programs around the globe.

How it works:

- The app guides the user through the notification process, allowing a new message to be created or an existing scenario that has already saved in the system to be activated. Users may also view statistics, record voice messages via the device microphone, and more.
- Authorized users can quickly and easily create a message and target desired recipients by selecting the appropriate audience based on event severity, defined groups and other qualifiers.
- Pinpoint the geographic area for your warning; the interface will display the targeted area and show how many contacts are within its boundaries.
- Select your message components and choose how your notification will be delivered. Dissemination paths include voice, text, email, the CodeRED Mobile Alert app, TDD/TTY, and more; all from a single user interface.

Why CodeRED?

Stay informed with an easy-to-use and highly reliable solution.

When agencies experience any situation in which immediate communication is required, public safety and government officials turn to CodeRED as a powerful and efficient tool to help you disseminate information to residents, visitors, and staff.

Built specifically for empowering critical communications nearly two decades ago, CodeRED delivers innovative technology that has supported more than a billion messages.

Please note: this feature will only work if it has been enabled by an OnSolve™ representative for your account.
