# Tech Talk

OnSolve One Call Now uses cloud computing technology, so message initiation requires no software purchase or installation. Other notification providers use hardware dialers— housed at your facility—for day-to-day phone calls and use web-based notification only for emergencies.

We own, manage and invest heavily in our own multiple sets of telephony, text and email servers

Triple redundant systems; geographically diverse facilities

System designed for 2000% average daily volume

Cross connect to multiple long distance carriers

Dynamic pacing assures best delivery

## Import Wizard

### The fastest way to get started

Walks you through a simple step-by-step process to upload a spreadsheet of contact information directly to our servers.

## OnSolve One Call SYNC

### For schools with large or frequently changing sis databases.

Automates transfer of student and/or staff lists exported from your SIS or other database. Launches attendance, low lunch balance, or any other pre-defined calls through your One Call Now account. Updates continuously.
