

OnSolve Global Travel Risk Management

Protect Your Employees Wherever They Are

Today's world is unpredictable, and travel is increasingly susceptible to the effects of pandemics, severe weather, acts of terrorism, active shooters and other threats. As an employer, it is your responsibility to protect your people every step of the way.

When a critical event occurs, having visibility into the event and the tools to reach your travelers is essential, so planning and processes should be in place well before any crisis occurs. The stakes are high: the consequences of being ill-prepared can come in the form of human lives, financial loss, legal consequences and damage to your reputation.

What is Travel Risk Management?

Travel risk management is more than the right thing to do — it's an essential component of corporate responsibility. As with organizational risk management, being uninformed or unprepared isn't an acceptable defense.

A robust protection program empowers multiple, interdependent departments and functions. The accountability test is "foreseeable risk" of harm that could come to employees on company time.

A comprehensive travel risk management program must address **risk**, **response** and **support**:

Risk

Anticipating and preparing for risk requires real-time critical event intelligence that is weighed in the context of your company's unique footprint of travel plans, events, offices and logistics.

Response

Critical event response plans must include clear processes for locating, communicating with, assisting and potentially extracting your people — across borders, time zones and governments.

Support

Ensure your travelers have access to 24/7 support so they feel comfortable knowing they can always get in touch with someone in times of crisis.

Why OnSolve

OnSolve fuses broad coverage with unparalleled speed to bring you the most accurate, actionable picture of your world, allowing you to keep your traveling and remote employees safe.

Speed

Scans myriad global data sources continuously, tracking more than 50 types of threats, and rapidly notifies stakeholders all over the world.

Relevance

Filters out noise and delivers actionable intelligence about events that directly impact your organization.

Usability

Simplifies processes for building alert triggers with predefined criteria, and offers a short learning curve, even under strenuous conditions, through a user-friendly design.

Fast. Targeted. Trusted.

OnSolve protects traveling and remote employees during a critical event.

Know What's Happening Sooner

OnSolve's AI engine recognizes over 50 types of threats and delivers fast, relevant intelligence. A single dashboard allows you to integrate stakeholders across the organization, including HR, training, logistics, facilities and your executive team.

Monitor and Communicate with Confidence

Continuous monitoring helps pinpoint trouble spots so you can proactively equip employees with tracking and emergency communications and map safe-zone parameters, while giving them control over levels of privacy. Automatic alerts provide your travelers with a real-time understanding of how a critical event impacts their travel.

Respond Without Hesitation

When you're receiving relevant information faster, you can access response plans for locating, alerting and assisting employees. You'll also have the data to back decisions about additional protection measures like GPS tracking and mobile-device panic buttons.

When Every Minute Counts™

Your employees are your biggest investment and most valuable asset — they are vital to keeping your business functioning. Their safety must be your priority.
